PROFESSIONAL EXPERIENCE

Associate QA Engineer, *Ek ra Sunya Inc*

02/2026 – Present | Kathmandu, Nepal

Projects worked upon:
EMIS | Avani Cricket Club | Official Global Partner | ACAN | TravelQuoter | EkERP | Payroll

- Performed **functional, regression, integration, negative, exploratory, and end-to-end testing** across multiple web applications and business modules.
- Designed and executed **test cases** covering positive/negative scenarios, edge cases, validation rules, business logic, authentication, authorization, and role-based access control.
- Performed **API testing using Postman**, validating HTTP methods, request/response payloads, status codes, authentication, error handling, and data consistency.
- Conducted **role and permission testing** across different application users and modules, identifying unauthorized access and privilege-related defects.
- Used **Browser DevTools** to inspect network requests, API responses, and client-side behavior during defect investigation.
- Tested complete business workflows across multiple modules and user roles to validate **end-to-end functionality and data flow**.
- Reported and tracked defects in **Jira**, documenting reproduction steps, severity, expected vs. actual results, evidence, and relevant observations.
- Collaborated with developers throughout the **defect lifecycle**, including bug reproduction, retesting, regression testing, and verification of fixes.
- Maintained **Requirements Traceability Matrix (RTM)** and test documentation to ensure adequate test coverage.
- Identified **high-severity authorization and sensitive-data exposure issues**, including unintended exposure of privileged authentication information through a publicly accessible API response.
